EDUCATION

2022 – 2026	B.Tech in Computer Science and Engineering , Medicaps University	(CGPA: 8.2/10.0)
2021 – 2022	Class 12 (CICSE) , Little Wonders Convent School	(81%)
2019 – 2020	Class 10 (CICSE) , Little Wonders Convent School	(87%)

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, SQL, C++, HTML, CSS
Frameworks	Spring Boot, Spring MVC, React.js, Tailwind CSS, Bootstrap
Databases & Caching	PostgreSQL, MySQL, Redis
Tools & Technologies	Git, GitHub, AWS, Supabase, Postman, JUnit, Swagger, Docker, WebSockets

WORK EXPERIENCE

Java Developer Trainee — 5Exceptions Jul 2025 – Dec 2025

- Developed backend services utilizing Core Java, Spring Boot, and RESTful APIs, reducing system latency by 20%.
- Designed PostgreSQL database schemas, optimizing data storage and accelerating query retrieval speeds by 25%.
- Adopted clean architecture and modular coding practices, decreasing future maintenance overhead by an estimated 15%.
- Conducted unit testing with JUnit and API validation via Postman, achieving 85% code coverage and ensuring robust deployments.
- Collaborated in an Agile team of 5, actively participating in bi-weekly code reviews and performance profiling.

PROJECTS

Wattgram – Social Media Backend (🔗 Repo) — Spring Boot, PostgreSQL, Redis, JWT, WebSockets

- Architected a scalable social media backend to manage content and interactions for up to 500 simulated concurrent users.
- Engineered a real-time messaging system using WebSockets, enabling instant communication with sub-50ms latency.
- Integrated Redis caching to optimize frequent database reads, reducing API response times by over 30%.
- Secured REST endpoints by establishing stateless authentication pipelines with Spring Security and JWT.
- Programmed APIs for post creation and engagement tracking, handling 1,000+ mock database transactions efficiently.

Resume Parser & Job Matching Platform (🔗 Repo) — Python, React, NLP, Supabase

- Created a high-performance parsing engine leveraging Python and pdfplumber, extracting candidate data with 90% accuracy.
- Formulated Natural Language Processing (NLP) pipelines using spaCy to structure 500+ complex candidate profiles.
- Devised a semantic job matching algorithm using vector embeddings, improving role alignment precision by 40%.
- Deployed Supabase for secure user authentication and scalable cloud data storage, maintaining 99% uptime during testing.

HACKATHONS & ACHIEVEMENTS

Amazon ML Challenge (Hackathon) Oct 2025

- Ranked in the top 25% of 5,000+ participants by developing a multimodal machine learning solution.
- Extracted textual features utilizing Python, pandas, TF-IDF, and SentenceTransformer embeddings to process 10,000+ data points.
- Generated image-based features using timm and PyTorch, fusing them for advanced multimodal learning applications.
- Trained predictive models using scikit-learn, implementing cross-validation techniques to boost model accuracy by 15%.

CERTIFICATIONS

Cisco - Cybersecurity Fundamentals	Microsoft - Generative AI Essentials
Microsoft - Software Development Lab	Palo Alto - Virtual Internship
